

Abstract of the Disclosure

METHODS AND SYSTEMS FOR TRADING OF
FUTURES CONTRACTS FOR INTANGIBLE ASSETS

5 Methods and systems for trading of future
contracts for intangible assets are provided. The
methods and systems allow traders to access information
on intangible asset futures contracts and future contract
funds and to execute their trades in a computer-based
10 futures exchange. Intangible assets include future
royalties or revenues from artistic works or future
salaries of professionals, for instance. The futures
exchange system provides real-time trading status on the
futures contracts or funds as well as detailed
15 information on contract terms. Quotes may be matched
automatically by the futures exchange. Sensitivity
analysis of various factors on the outcome of futures
contracts valuation may be provided. Additionally, offer
and contract terms for categories of intangible assets
20 may be standardized in the futures exchange for trading
simplification.
